

Public Services

How do you see existing public facilities and services within the proposed urban growth area improving?

1. Roads w/sidewalks; sewer where necessary.
2. I want it to be in the City of Snohomish not Lake Stevens. It's a Snohomish Community.
3. Sidewalks at overpass on Hwy 9 & Hewitt. Traffic congestion must be relieved before new development occurs.
4. Police fire ok now – utilities ok
5. Provide adequate trans infrastructure before more development.
6. Improve Hwy 9 and SR-2 – Better transit into Everett and south to King Co.
7. We have no bus service the access to 20 is horrible to non non-existent. New proj. across from Cavalero is going to make access worse. Light at Cavalero and 20 will back up the hill.
8. If Snohomish goes into the Lake Stevens fire district does the land transfer to Lake Stevens fire lose that tax base?
9. Water repair is great. Sewer would help some of the flooding.
10. Sewer won't help flooding! ↑
11. Need 1 more trestle!
12. There is no money to expand the trestle; to widen Hwy 9 or to keep Highway 2 safe. This is a very premature visioning exercise! This area should remain rural. We can't afford new roads!
13. Buses from Frontier Village to Snohomish? – now have to go into Everett to go to Snohomish, Monroe.
14. Lake Stevens go away
15. Sewer too costly
16. Septic works fine. Fire Dist 4 works for us – good. County deputies respond quickly – fine. Could use a bus route between our area and the east side via SR9. Snohomish School district – great.
17. All of your maps are misleading!
18. Water run off should be controlled so streets are not flooded.
19. Very concerned about the cost of sewer hook-ups. There are several retired folks in this area & can not afford a significant levy.
20. Would rather be served by the City of Snohomish as it is closer and our city of choice. We do need sewer, fire and especially police due to increased crime in the area.
21. Increased crime is directly related to growth. ↑
22. Everything is fine as long as the politicians and developers leave us alone!!
23. No Change – roads suit – existing rural population fine. I chuckled at the roads they chose that need shoulders and sidewalks – Not Necessary – I walk these roads a lot with kids and dogs. Why are the people in charge always trying to spend our monies unnecessarily?
24. The City of Snohomish is better positioned to provide urban services efficiently for the southern portion of the study area.

- 25.No sewer
- 26.We can have a successful community if we invest in the critical infrastructure to support the people in the area. Better road and transit management& design & ways to connect the communities to parks and commercial areas that are healthy &gentle on the environment... bike paths ped zones sidewalks.
- 27.Not interested in any planning by Lake Stevens.
- 28.There is a water problem between 20th & S. Lk Stevens Rd. no drainage.
- 29.Snohomish affiliation is key component of southern UGA residence
- 30.We would like to be a part of the Snohomish Service area. It is closer to our neighborhood (Joywood). We would like to see sewer but it is closer to come from Snohomish. Roads need improved period.
- 31.We need to expand the sewer services to this area. Road improvement is planned on 20th and 9 and hopefully Hwy 2. This area is excellent for commercial mixed use housing so we need to look at how we can get what we want and need.
- 32.Need Hwy 9 freeway. Hwy 2 should be a freeway
- 33.Better public transportation easier to access
- 34.Lake Stevens police is much better than county
- 35.Roads must be the first priority for any growth. There is no room to expand the major in-roads to this area. It is an accident waiting to happen!
- 36.Fire/ police are great just as they are in Snohomish (unincorporated)
- 37.Sewers are too expensive
- 38.Add a reliable bus system on hiway 9- Lake Stevens to Woodinville.
- 39.Don't make existing septic tank residents pay for sewer hook-up when it is force on them.
- 40.Expand hiway 9 before developing this area.
- 41.Police (Sheriff) & Fire ok now. Fast response to emergencies.
- 42.S. Lk. Stevens Rd is already a clone of Hwy 9. We do not need any more development/ more traffic!!
- 43.No sidewalks. No College. Go Away! No changes! No sewers on SLK Stevens Rd! No more Development! And improved services will not support more people.
- 44.Sewers on S. Lk. Stevens Rd?
- 45.Put in a commuter train from Snohomish to Woodinville!
- 46.Tom Marks Rd area should stay Snohomish.
- 47.The services we have now are adequate, except that the roads are overcrowded. This will only get worse when the Fred Meyer – Home Depot mall opens. We do not need a sewer. We do not want to pay for connecting to the sewer. The bus service on Bickford Ave is pretty good, but not as convenient as driving. Perhaps when the roads are totally clogged we will have to ride buses. But is seems that we have little control over the traffic problems.
- 48.Joywood and its surrounding are needs to stay with Snohomish. The whole area identifies w/Snohomish and should stay w/ them.
